Education

University of Washington — Seattle, WA
Bachelor of Computer Science — *Sep. 2026 – Jun. 2030*

Experience

Computer programmer — Feb. 2025 – Jun. 2026
Thinking Beyond Education — *Remote*

- Worked on backend efficiency and data management projects; helped develop a Discord chatbot.
- Utilized tools such as Google Colab, Overleaf, LaTeX, APIs, Vercel, and MongoDB.
- Collaborated with Google DeepMind on a research project.

Event Chief Officer, Internal Affairs Officer — Sep. 2024 – Jun. 2026
Stem Support — *Remote*

- Organized and led online STEM workshops, hackathons, and games.
- Successfully managed a team of 10+ people and coordinated with multiple departments.
- Conducted 10+ volunteer interviews and assisted with executive selection.

Outreach Specialist, Webmaster — Oct. 2024 – Jul. 2026
Young Minds Eye — *Remote*

- Conducted outreach to establish partnerships and communicated with external stakeholders.
- Designed, updated, and revamped the organization's website.
- Organized backend Google Drive and spreadsheets and applied strong computer skills.

Projects

HealthWise MS | *JavaScript, React Native, Gemini API, Git* — Jan. 2024 – May 2025

- Developed a full-stack mobile app using React Native and JavaScript.
- Conducted market research, wrote a business plan, and collected user feedback.
- 4 main features: an information search page with a chatbot, reminders page, map, notes page.
- Utilized multiple APIs and collaborated via Git.

Norman Sicily Research | *LLM, GPT-4o, RAG, Python, Git* — Jun. 2025 – Jul. 2025

- Analyzed and investigated the settlement patterns of monasteries and fortifications in ancient Norman Sicily.
- Trained a chatbot using query tools, RAG, and GPT-4o.
- Applied statistical and machine learning techniques like Pearson correlation, K-means clustering, and ANOVA.

OOTD Generator | *JavaScript, HTML/CSS, Vite, React, Git* — Aug. 2026

- Developed a website using React and Vite that help user generate outfit based on live weather.
- Used Supabase for backend services and Vercel for frontend hosting.
- Connected WeatherAPI for live weather.
- Implemented an admin page that allows users to upload clothing images.

Technical Skills

Languages: Python, JavaScript, HTML/CSS, Java
Frameworks & Technologies: React, Node.js, Vite, React Native
Developer Tools: Git, Docker, Vercel, Supabase, VS Code, Google Colab, Cursor
Libraries: pandas, NumPy, Matplotlib
Relevant coursework: Introduction to Computer Programming II and III (Java), Computer Programming (Python)

Achievements

DubHacks Visa Track Winner | *October 2026*
DubHacks SideShift Track – 3rd Place | *October 2026*
Develop for Good Fellow | *October 2026*
NASA Space Apps Challenge – Regional 3rd Place | *November 2025*
Technovation Girls – Global Semifinalist | *May 2025*
